

Vitamin B15 hemicalcium

Cat. No.:	HY-N7384A
CAS No.:	20310-61-6
Molecular Formula:	C ₁₀ H ₁₉ NO ₈ ·1/2Ca
Molecular Weight:	301.3
Target:	Others
Pathway:	Others
Storage:	Please store the product under the recommended conditions in the Certificate of Analysis.

BIOLOGICAL ACTIVITY

Description	Vitamin B15 (Pangamic Acid) hemicalcium is a natural, ubiquitously in plant seeds substance and can used be as an agent stimulating cellular respiration. Vitamin B15 hemicalcium contains D-gluconodimethyl amino acetic acid. Vitamin B15 hemicalcium is also a immune-correcting agent ^{[1][2]} . Vitamin B15 hemicalcium can be used for wide range of diseases.
In Vivo	<p>Vitamin B15 (Wistar rats; 2.5 mg/100 g of diet) hemicalcium increases the degree of fatty infiltration of the liver which is maintained at a stable level throughout the whole experiment^{[1][3]}.</p> <p>Vitamin B15 hemicalcium enriches in the rat diet reduced glutathione peroxidase (after one year) and also glutathione transferase (after 18 months) in the brains of the animals, thus impairing their antioxidative capacities^[1].</p> <p>Vitamin B15 hemicalcium increase the cytochrome oxidase- and also succinate dehydrogenase-activity in certain rat tissues [1].</p> <p>MCE has not independently confirmed the accuracy of these methods. They are for reference only.</p>
