

## Protoescigenin

Cat. No.:	HY-N7497
CAS No.:	20853-07-0
Molecular Formula:	C <sub>30</sub> H <sub>50</sub> O <sub>6</sub>
Molecular Weight:	506.71
Target:	Others
Pathway:	Others
Storage:	Please store the product under the recommended conditions in the COA.

### BIOLOGICAL ACTIVITY

#### Description

Protoescigenin is the main aglycone of horse chestnut saponin mixture known as escin. Protoescigenin is selected as substrate for exploratory chemistry towards selective protection, followed by propargyl ether formation and subsequent condensation with azido-monosaccharides, to obtain novel triazole linked conjugates of the triterpene<sup>[1]</sup>.
