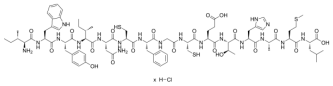
G6PI 325-339 (human) (hydrochloride)

Cat. No.:	HY-P10109A
Molecular Formula:	$C_{82}H_{118}ClN_{19}O_{21}S_3.xHCl$
Sequence:	Ile-Trp-Tyr-Ile-Asn-Cys-Phe-Gly-Cys-Glu-Thr-His-Ala-Met-Leu
Sequence Shortening:	IWYINCFGCETHAML
Target:	Others
Pathway:	Others
Storage:	Please store the product under the recommended conditions in the Certificate of Analysis.



BIOLOGICAL ACTIVITY

Description	G6PI 325-339 (human) hydrochloride is an efficient inducer of arthritis in B10.Q mice. G6PI 325-339 (human) hydrochloride primes Th1 and Th17 cells cross-reacted with the murine G6PI protein. G6PI 325-339 (human) hydrochloride induces arthritis model operating through a T and B cell-dependent pathway but without antibody effector mechanisms[1].
