

Tat-beclin 1 scrambled

Cat. No.:	HY-P2260B
Molecular Formula:	C ₁₆₄ H ₂₅₁ N ₅₇ O ₄₅
Molecular Weight:	3741.1
Sequence:	Tyr-Gly-Arg-Lys-Lys-Arg-Arg-Gln-Arg-Arg-Arg-Gly-Gly-Val-Gly-Asn-Asp-Phe-Phe-Ile-Asn -His-Glu-Thr-Thr-Gly-Phe-Ala-Thr-Glu-Trp
Sequence Shortening:	YGRKKRRQRRRGVGNDFFINHETTGFATEW
Target:	HIV
Pathway:	Anti-infection
Storage:	Please store the product under the recommended conditions in the Certificate of Analysis.

BIOLOGICAL ACTIVITY

Description

Tat-beclin 1 scrambled is the scrambled part and a scrambled control of Tat-beclin 1 (HY-P2260), which is derived from a region of the autophagy protein, beclin 1. beclin 1 induces autophagy via binding human immunodeficiency virus, HIV-1 Nef and interacting with negative regulator GAPR-1 (GLIPR2). Tat-beclin 1 decreases the accumulation of polyglutamine expansion protein aggregates and the replication of several pathogens, such as HIV-1. Tat-beclin 1 also reduces mortality in mice infected with chikungunya or West Nile virus^[1].
