

Acyl coenzyme A synthetase

Cat. No.:	HY-P2832	
CAS No.:	9013-18-7	
Target:	Endogenous Metabolite	
Pathway:	Metabolic Enzyme/Protease	Acyl coenzyme A synthetase
Storage:	Please store the product under the recommended conditions in the Certificate of Analysis.	

BIOLOGICAL ACTIVITY

Description

Acyl coenzyme A synthetase (ACS), namely acetyl coenzyme A synthetase, is often used in biochemical research. Acyl coenzyme A synthetase can catalyze the activation of fatty acids by coenzyme A through a two-step thioesterification reaction to produce acyl coenzyme A, and then participate in a variety of anabolic and catabolic lipid metabolism pathways, and participate in the TCA cycle in aerobic respiration^[1].
