

YNPCVMYL (Thioester: Cys4-Leu8) (TFA)

Cat. No.:	HY-P5300A
Molecular Formula:	C ₄₈ H ₆₆ F ₃ N ₉ O ₁₃ S ₂
Molecular Weight:	1098.22
Sequence:	Tyr-Asn-Pro-Cys-Val-Met-Tyr-Leu (Thioester: Cys4-Leu8)
Sequence Shortening:	YNPCVMYL (Thioester: Cys4-Leu8)
Target:	Others
Pathway:	Others
Storage:	Sealed storage, away from moisture and light, under nitrogen Powder -80°C 2 years -20°C 1 year * In solvent : -80°C, 6 months; -20°C, 1 month (sealed storage, away from moisture and light, under nitrogen)

BIOLOGICAL ACTIVITY

Description

YNPCVMYL (Thioester: Cys4-Leu8) TFA is a polypeptide chain of the YNPCVMYL sequence. The link between the fourth and eighth amino acids in the sequence has the properties of a thioester, which is formed between cysteine (Cys4) and leucine (Leu8).

Caution: Product has not been fully validated for medical applications. For research use only.
