

SAIRGA TFA

Cat. No.:	HY-P6012A
Molecular Formula:	C ₂₃ H ₄₃ N ₉ O ₈ ·xC ₂ HF ₃ O ₂
Target:	Others
Pathway:	Others
Storage:	Sealed storage, away from moisture and light
	Powder -80°C 2 years
	-20°C 1 year

* In solvent : -80°C, 6 months; -20°C, 1 month (sealed storage, away from moisture and light)

BIOLOGICAL ACTIVITY

Description

SAIRGA (TFA), derived from the phages phi3T, can recognize phAimR in the bacterial cytosol to induce lysogeny^[1].
