

## Product Data Sheet

## FGL2 Protein, Human (HEK293, His-Avi, Flag)

Cat. No.:	HY-P700721
Synonyms:	Fibroleukin; pT49; FGL2; fibrinogen-like 2;
Species:	Human
Source:	HEK293
Accession:	Q14314 (V205-P439)
Gene ID:	10875
Molecular Weight:	40-50 kDa

PROPERTIES	
PROPERTIES	
Biological Activity	Immobilized Human FGL2, His Tag at 0.5µg/ml (100µl/well) on the plate. Dose response curve for Anti-FGL2 Antibody, hFc Tag with the EC <sub>50</sub> of 14ng/ml determined by ELISA.
Appearance	Lyophilized powder.
Formulation	Lyophilized from a 0.22 μm filtered solution of PBS, pH 7.4. Normally 8% trehalose is added as protectant before lyophilization.
Endotoxin Level	<1 EU/µg, determined by LAL method.
Reconsititution	It is not recommended to reconstitute to a concentration less than 100 $\mu\text{g}/\text{mL}$ in ddH_2O.
Storage & Stability	Stored at -20°C for 2 years. After reconstitution, it is stable at 4°C for 1 week or -20°C for longer (with carrier protein). It is recommended to freeze aliquots at -20°C or -80°C for extended storage.
Shipping	Room temperature in continental US; may vary elsewhere.

## DESCRIPTION

BackgroundThe FGL2 protein appears to play a role in physiologic lymphocyte functions at mucosal sites, suggesting its involvement in<br/>immune responses specific to mucosal tissues. Its potential contribution to lymphocyte functions implies a role in the<br/>regulation of immune activities at these specialized sites. Structurally, FGL2 forms homotetramers that are disulfide-linked,<br/>highlighting its quaternary structure. Further exploration into the specific mechanisms by which FGL2 influences physiologic<br/>lymphocyte functions at mucosal sites and the functional consequences of its homotetrameric organization could provide<br/>valuable insights into its role in mucosal immunity and immune system regulation.

## Caution: Product has not been fully validated for medical applications. For research use only.
