

Product Data Sheet

LILRA6/CD85b/ILT-8 Protein, Cynomolgus (HEK293, His)

Cat. No.:	HY-P700777
Synonyms:	7M1; CD85b; ILT8; LILRA6; Pira3
Species:	Cynomolgus
Source:	HEK293
Accession:	A0A2K5VN04 (G41-H474)
Gene ID:	/
Molecular Weight:	68-75 kDa

PROPERTIES	
Appearance	Lyophilized powder.
Formulation	Lyophilized from a 0.22 μm filtered solution of PBS, pH 7.4. Normally 8% trehalose is added as protectant before lyophilization.
Endotoxin Level	<1 EU/µg, determined by LAL method.
Reconsititution	It is not recommended to reconstitute to a concentration less than 100 $\mu\text{g}/\text{mL}$ in ddH_2O.
Storage & Stability	Stored at -20°C for 2 years. After reconstitution, it is stable at 4°C for 1 week or -20°C for longer (with carrier protein). It is recommended to freeze aliquots at -20°C or -80°C for extended storage.
Shipping	Room temperature in continental US; may vary elsewhere.

DESCRIPTION	
Background	LILRA6/CD85b/ILT-8 Protein appears to function as a receptor for class I MHC antigens, suggesting a pivotal role in immu recognition and regulation. Its ability to interact with class I MHC molecules indicates its involvement in monitoring and potentially modulating immune responses. As a receptor, LILRA6 may contribute to the precise recognition of cells presenting class I MHC antigens, thereby influencing immune activities. Further exploration of LILRA6's interactions and impact on immune signaling could deepen our understanding of its role as a receptor and its potential implications in immune surveillance and regulatory mechanisms.

Caution: Product has not been fully validated for medical applications. For research use only.
