

IL-3R alpha/CD123 Protein, Cynomolgus (HEK293, His)

Cat. No.:	HY-P70461
Synonyms:	Interleukin-3 receptor subunit alpha; IL-3 receptor subunit alpha; IL-3R subunit alpha; IL-3R-alpha; IL-3RA; CD123
Species:	Cynomolgus
Source:	HEK293
Accession:	G8F3K3 (R18-R302)
Gene ID:	102138639
Molecular Weight:	50-65 kDa

PROPERTIES

AA Sequence	<pre> RTKEDPNAPI RNLRMKEKAQ QLMWDLNRNV TDVECIKGTD YSMPAMNNSY CQFGAISLCE VTNYTVRVAS PPFSTWILFP ENSGTPRAGA ENLTCWVHDV DFLSCSWVVG PAAPADVQYD LYLNNPNSHE QYRCLHYKTD ARGTQIGCRF DDIAPLSRGS QSSHILVRGR SAAVSIPTCD KFVFFSQIER LTPPNMTGEC NETHSFMHWK MKSHFNKFR YELRIQKRMQ PVRTEQVRDT TSFQLPNPGT YTVQIRARET VYEFLSAWST PQRFECDQEE GASSR </pre>
Appearance	Lyophilized powder.
Formulation	Lyophilized from a 0.2 µm filtered solution of PBS, pH 7.4.
Endotoxin Level	<1 EU/µg, determined by LAL method.
Reconstitution	It is not recommended to reconstitute to a concentration less than 100 µg/mL in ddH ₂ O. For long term storage it is recommended to add a carrier protein (0.1% BSA, 5% HSA, 10% FBS or 5% Trehalose).
Storage & Stability	Stored at -20°C for 2 years. After reconstitution, it is stable at 4°C for 1 week or -20°C for longer (with carrier protein). It is recommended to freeze aliquots at -20°C or -80°C for extended storage.
Shipping	Room temperature in continental US; may vary elsewhere.

DESCRIPTION

Background	The IL-3R alpha/CD123 Protein is a crucial member of the type I cytokine receptor family, specifically categorized within the Type 5 subfamily, emphasizing its pivotal role in mediating cellular responses to various cytokines. As part of this receptor family, IL-3R alpha/CD123 likely shares conserved structural and functional features with related receptors, underscoring its involvement in transducing signals from specific type I cytokines. The classification within the type I cytokine receptor
-------------------	---

family underscores its specific designation within the broader context of cell signaling, providing insights into its unique contributions to hematopoiesis and immune regulation. The study of IL-3R alpha/CD123 contributes to our understanding of its role in physiological processes, offering potential applications in therapeutic interventions for conditions related to hematopoietic disorders and immune dysregulation. Further exploration of IL-3R alpha/CD123's role holds promise for enhancing our knowledge of its contributions to both normal cellular function and pathological conditions.

Caution: Product has not been fully validated for medical applications. For research use only.
