

## Serpin E2 Protein, Mouse (HEK293, His, solution)

<b>Cat. No.:</b>	HY-P71294Y
<b>Synonyms:</b>	Glia-derived nexin; GDN; Peptidase inhibitor 7; PI-7; Protease nexin 1; PN-1; Protease nexin I; Serine protease-inhibitor 4; Serpin E2; Pi7; Pn1; Spi4
<b>Species:</b>	Mouse
<b>Source:</b>	HEK293
<b>Accession:</b>	Q07235 (S20-P397)
<b>Gene ID:</b>	20720
<b>Molecular Weight:</b>	approximately 48 kDa

### PROPERTIES

<b>AA Sequence</b>	<p>S Q F N S L S L E E    L G S N T G I Q V F    N Q I I K S R P H E    N V V V S P H G I A</p> <p>S I L G M L Q L G A    D G K T K K Q L S T    V M R Y N V N G V G    K V L K K I N K A I</p> <p>V S K K N K D I V T    V A N A V F L R N G    F K M E V P F A V R    N K D V F Q C E V Q</p> <p>N V N F Q D P A S A    S E S I N F W V K N    E T R G M I D N L L    S P N L I D G A L T</p> <p>R L V L V N A V Y F    K G L W K S R F Q P    E S T K K R T F V A    G D G K S Y Q V P M</p> <p>L A Q L S V F R S G    S T R T P N G L W Y    N F I E L P Y H G E    S I S M L I A L P T</p> <p>E S S T P L S A I I    P H I T T K T I D S    W M N T M V P K R M    Q L V L P K F T A V</p> <p>A Q T D L K E P L K    A L G I T E M F E P    S K A N F T K I T R    S E S L H V S H I L</p> <p>Q K A K I E V S E D    G T K A S A A T T A    I L I A R S S P P W    F I V D R P F L F S</p> <p>I R H N P T G A I L    F L G Q V N K P</p>
<b>Appearance</b>	Solution.
<b>Formulation</b>	Supplied as a 0.2 µm filtered solution of 20 mM Tris-HCl, 150 mM NaCl, pH 8.0.
<b>Endotoxin Level</b>	<1 EU/µg, determined by LAL method.
<b>Reconstitution</b>	N/A.
<b>Storage &amp; Stability</b>	Stored at -80°C for 1 year. It is stable at -20°C for 3 months after opening. It is recommended to freeze aliquots at -80°C for extended storage. Avoid repeated freeze-thaw cycles.
<b>Shipping</b>	Shipping with dry ice

### DESCRIPTION

<b>Background</b>	Serpin E2, a serine protease inhibitor, exhibits inhibitory activity against thrombin, trypsin, and urokinase. Notably, it plays a role in promoting neurite extension by specifically inhibiting thrombin, emphasizing its involvement in neurodevelopmental processes. Additionally, Serpin E2 is recognized for its ability to bind heparin, showcasing its interaction with this important
-------------------	--

---

glycosaminoglycan. The multifaceted inhibitory functions of Serpin E2 underscore its significance in regulating serine protease activities and its potential impact on cellular processes, particularly in the context of neurodevelopment.
