

Product Data Sheet

TMSB4X Protein, Human (His)

Cat. No.: HY-P71930A

Synonyms: Fx; Hematopoietic system regulatory peptide; Prothymosin beta 4; PTMB 4; PTMB4;

Seraspenide; T beta 4; T beta-4; TB4X; THYB 4; Thyb4; Thymosin beta 4; Thymosin beta 4 X

chromosome; Thymosin beta 4 X linked; TMSB 4; TMSB4; Tmsb4x; TYB4_HUMAN

Species: Human E. coli Source:

Accession: P62328 (S2-S44)

Gene ID: 7114

Molecular Weight: Approximately 13 kDa

PROPERTIES

AA Sequence

SDKPDMAEIE KFDKSKLKKT ETQEKNPLPS KETIEQEKQA

G E S

Data is not available. **Biological Activity**

Lyophilized powder. **Appearance**

Formulation Lyophilized from a 0.2 µm filtered solution of 50 mM Tris-HCL, 300 mM NaCl, pH 7.4.

Endotoxin Level <1 EU/µg, determined by LAL method.

Reconsititution It is not recommended to reconstitute to a concentration less than 100 μg/mL in ddH₂O. For long term storage it is

recommended to add a carrier protein (0.1% BSA, 5% HSA, 10% FBS or 5% Trehalose).

Storage & Stability Stored at -20°C for 2 years. After reconstitution, it is stable at 4°C for 1 week or -20°C for longer (with carrier protein). It is

recommended to freeze aliquots at -20°C or -80°C for extended storage.

Shipping Room temperature in continental US; may vary elsewhere.

DESCRIPTION

Background

TMSB4X protein assumes a crucial role in cytoskeletal organization, as evidenced by its documented impact on actin dynamics. It functions by binding to and sequestering actin monomers (G actin), thereby acting as a potent inhibitor of actin polymerization. Beyond its influence on the cytoskeleton, TMSB4X emerges as a robust inhibitor of bone marrow-derived stem cell differentiation, exerting its effects by impeding the entry of hematopoietic pluripotent stem cells into the S-phase. These multifaceted functions underscore the significance of TMSB4X in orchestrating fundamental cellular processes, including cytoskeletal integrity and stem cell differentiation, highlighting its regulatory role in maintaining cellular homeostasis and orchestrating dynamic cellular responses.
