

# Certificate of Analysis

## FGFR-4 Protein, Human (HEK293, His)

|                   |                      |
|-------------------|----------------------|
| Cat. No.:         | HY-P73059            |
| Batch No.:        | 281152               |
| Species:          | Human                |
| Source:           | HEK293               |
| Tag:              | C-His                |
| Accession:        | P22455 (M1-D369)     |
| Gene ID:          | 2264                 |
| Molecular Weight: | Approximately 60 kDa |

### ANALYTICAL DATA

| TEST                | Specifications   | Results |
|---------------------|--|---------|
| Purity              | Greater than 90% as determined by reducing SDS-PAGE  | ≥90.0%  |
| Endotoxin Level     | <1 EU/μg, determined by LAL method.  | PASS    |
| Biological Activity | Measured by its ability to inhibit FGF acidic (aFGF / FGF1) dependent proliferation of Balb/c3T3 mouse embryonic fibroblasts. The ED <sub>50</sub> for this effect is typically 0.2-1 μg/mL. | PASS    |
| Appearance          | Lyophilized powder   |         |
| Reconstitution      | It is not recommended to reconstitute to a concentration less than 100 μg/mL in ddH <sub>2</sub> O.  |         |
| Storage & Stability | Stored at -20°C. After reconstitution, it is stable at 4°C for 1 week or -20°C for longer. It is recommended to freeze aliquots at -20°C or -80°C for extended storage.                      |         |
| Shipping            | Room temperature in continental US; may vary elsewhere.  |         |

**Caution: Product has not been fully validated for medical applications. For research use only.**
