

Claudin-11/CLDN11 Protein, Human (HEK293, Fc)

Cat. No.:	HY-P74250
Synonyms:	Claudin-11; CLDN11; OSP; OTM
Species:	Human
Source:	HEK293
Accession:	O75508 (V23-R82)
Gene ID:	5010
Molecular Weight:	Approximately 37 kDa

PROPERTIES

Appearance	Lyophilized powder.
Formulation	Lyophilized from a 0.2 μ m filtered solution of PBS, pH 7.4. Normally 5 % - 8 % trehalose, mannitol and 0.01% Tween 80 are added as protectants before lyophilization.
Endotoxin Level	<1 EU/ μ g, determined by LAL method.
Reconstitution	It is not recommended to reconstitute to a concentration less than 100 μ g/mL in ddH ₂ O.
Storage & Stability	Stored at -20°C for 2 years. After reconstitution, it is stable at 4°C for 1 week or -20°C for longer (with carrier protein). It is recommended to freeze aliquots at -20°C or -80°C for extended storage.
Shipping	Room temperature in continental US; may vary elsewhere.

DESCRIPTION

Background	Claudin-11 (CLDN11) assumes a crucial role in the precise closure of the intercellular space within tight junctions, primarily facilitated by its calcium-independent cell-adhesion capabilities. This protein also engages in interactions with tetraspanin-3/TSPAN3, indicating potential collaborative roles within cellular processes. Furthermore, CLDN11 forms associations with OCLN, as observed in experimental findings, elucidating its involvement in molecular interactions that contribute to the structural integrity and functional regulation of tight junctions.
