Proteins

Product Data Sheet

CD63 Protein, Rat (HEK293, Fc)

Cat. No.: HY-P74281

Synonyms: CD63 antigen; LAMP-3; Tspan-30; CD63; MLA1; TSPAN30

Species:

HEK293 Source:

Accession: P28648 (A103-V203)

Gene ID: 29186

Molecular Weight: 42-47 kDa

PROPERTIES

Appearance	Lyophilized powder.
Formulation	Lyophilized from a 0.2 μ m filtered solution of PBS, pH 7.4. Normally 5 % - 8 % trehalose, mannitol and 0.01% Tween 80 are added as protectants before lyophilization.
Endotoxin Level	<1 EU/µg, determined by LAL method.
Reconsititution	It is not recommended to reconstitute to a concentration less than 100 $\mu g/mL$ in ddH ₂ O.
Storage & Stability	Stored at -20°C for 2 years. After reconstitution, it is stable at 4°C for 1 week or -20°C for longer (with carrier protein). It is recommended to freeze aliquots at -20°C or -80°C for extended storage.
Shipping	Room temperature in continental US; may vary elsewhere.

DESCRIPTION

Background

CD63 protein serves as a cell surface receptor for TIMP1, playing a crucial role in the activation of cellular signaling cascades. It contributes to the activation of ITGB1 and integrin signaling, leading to the activation of AKT, FAK/PTK2, and MAP kinases. Its involvement promotes cell survival, actin cytoskeleton reorganization, cell adhesion, spreading, and migration by activating AKT and FAK/PTK2. CD63 is also implicated in VEGFA signaling through its regulation of KDR/VEGFR2 internalization. Additionally, it plays a role in intracellular vesicular transport processes and is essential for the normal trafficking of the PMEL luminal domain, crucial for melanocyte development and maturation. CD63 is further involved in leukocyte adhesion to endothelial cells by regulating SELP trafficking. While it may participate in mast cell degranulation in response to Ms4a2/FceRI stimulation, its role in degranulation in response to other stimuli remains limited. CD63 interacts with TIMP1 and ITGB1, recruiting TIMP1 to ITGB1, forms a complex with CD9 and ITGB3, and interacts with PMEL, KDR/VEGFR2, and SYT7.
