<1 EU/µg, determined by LAL method.

Reconsititution

It is not recommended to reconstitute to a concentration less than 100 μg/mL in ddH<sub>2</sub>O. For long term storage it is recommended to add a carrier protein (0.1% BSA, 5% HSA, 10% FBS or 5% Trehalose).

Storage & Stability

Stored at -20°C for 2 years. After reconstitution, it is stable at 4°C for 1 week or -20°C for longer (with carrier protein). It is recommended to freeze aliquots at -20°C or -80°C for extended storage.

Shipping

Room temperature in continental US; may vary elsewhere.

## **DESCRIPTION**

Background

CD99 Protein, a member of the CD99 family, is a key player in several important cellular processes, including immune responses, cell adhesion, and migration. It exerts significant influence on lymphocyte trafficking and is involved in the regulation of immune cell interactions. CD99 Protein is known to be expressed on various immune cells, where it contributes to the formation of immunological synapses and facilitates the communication between different immune cells. Additionally, CD99 Protein is implicated in cell adhesion and migration processes, playing a crucial role in the transmigration of leukocytes across endothelial cell barriers. Through its multifaceted functions, CD99 Protein is essential
