

## **Certificate of Analysis**

## REG1B Protein, Rhesus Macaque (HEK293, His)

Cat. No.: HY-P77475

Batch No.: 322044

Species: Rhesus Macaque

Source: HEK293
Tag: C-His

Accession: NP\_001181497 (Q23-N166)

**Gene ID**: 711725

Molecular Weight: Approximately 17.7 kDa.

## ANALYTICAL DATA

| TEST                | Specifications                                                                                                                                                                                                         | Results      |
|---------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------------|
| Purity              | Greater than 95% as determined by reducing SDS-PAGE                                                                                                                                                                    | ≥95.0%       |
| Endotoxin Level     | <1 EU/µg, determined by LAL method.                                                                                                                                                                                    | PASS         |
| Biological Activity | Measured in a cell proliferation assay using RT4-D6P2T rat schwannoma cells. The ED $_{50}$ for this effect is 0.4012 $\mu$ g/mL, corresponding to a specific activity is 2.492×10 $^3$ units/mg.                      | 0.4012 μg/mL |
| Appearance          | Lyophilized powder                                                                                                                                                                                                     |              |
| Reconstitution      | It is not recommended to reconstitute to a concentration less than 100 $\mu$ g/mL in ddH <sub>2</sub> O. For long term storage it is recommended to add a carrier protein (0.1% BSA, 5% HSA, 10% FBS or 5% Trehalose). |              |
| Storage & Stability | Stored at -20°C for 2 years. After reconstitution, it is stable at 4°C for 1 week or -20°C for longer (with carrier protein). It is recommended to freeze aliquots at -20°C or -80°C for extended storage.             |              |
| Shipping            | Room temperature in continental US; may vary elsewhere.                                                                                                                                                                |              |
