

## Product Data Sheet

## B7-2/CD86 Protein, Human (Biotinylated, HEK293, His-Avi)

HY-P78064
CD86 molecule; CD86; B70; B7-2 antigen; B72; B7-2; BU63; FUN-1; LAB72; MGC34413; CD28LG2
Human
HEK293
P42081 (L26-P247)
942
55-70 kDa

PROPERTIES         Biological Activity       Immobilized Biotinylated Human B7-2 His at 0.5 µg/mL (100µL/Well) on the plate. Dose response curve for Human CTLA-4 hFc with the EC <sub>50</sub> of 0.3 µg/mL determined by ELISA.
Appearance Lyophilized powder.
<b>Formulation</b> Lyophilized from a 0.22 μm filtered solution of PBS, pH 7.4. Normally 5% trehalose is added as protectant before lyophilization.
<b>Endotoxin Level</b> <1 EU/μg, determined by LAL method.
<b>Reconsititution</b> It is not recommended to reconstitute to a concentration less than 100 $\mu$ g/mL in ddH <sub>2</sub> O.
Storage & Stability Stored at -20°C for 2 years. After reconstitution, it is stable at 4°C for 1 week or -20°C for longer (with carrier protein). It is recommended to freeze aliquots at -20°C or -80°C for extended storage.
ShippingRoom temperature in continental US; may vary elsewhere.

## DESCRIPTION

BackgroundB7-2/CD86 protein functions as a negative regulator of T-cell activation by disrupting the formation of CD86 clusters.<br/>Through this interference, it modulates the T-cell response and plays a role in regulating immune activation.

## Caution: Product has not been fully validated for medical applications. For research use only.
