Product Data Sheet

CARD9 Antibody

HY-P80582 Cat. No.:

Synonyms: CARD9 Antibody is a non-conjugated and Rabbit origined monoclonal antibody about 62 kDa,

targeting to CARD9. It can be used for WB assays with tag free, in the background of Human.

Rabbit Host: Reactivity: Human

Conjugation: Non-conjugated

SwissProt ID: Q9H257 Research Field: Cell Biology

Molecular Weight: Predicted band size: 62 kDa

PROPERT	

Formulation	Supplied in 50 mM Tris-Glycine (pH 7.4), 0.15 M NaCl, 40% Glycerol and 0.05% BSA. Preservative: 0.01% Sodium azide	
Purity	affinity purified	
Storage & Stability	Stored at -20°C for 1 year. Avoid repeated freeze / thaw cycles.	
Appearance	Liquid	
Application &	Application	Dilution Ratio
Dilution Ratio	WB	1:500-1:1,000
Shipping	Shipping with blue ice.	

DESCRIPTION

Background

CARD9: The protein encoded by this gene is a member of the CARD protein family, which is defined by the presence of a characteristic caspase-associated recruitment domain (CARD). CARD is a protein interaction domain known to participate in activation or suppression of CARD containing members of the caspase family, and thus plays an important regulatory role in cell apoptosis. This protein was identified by its selective association with the CARD domain of BCL10, a postive regulator of apoptosis and NF-kappaB activation, and is thought to function as a molecular scaffold for the assembly of a BCL10 signaling complex that activates NF-kappaB. Several alternatively spliced transcript variants have been observed, but their full-length nature is not clearly defined. [provided by RefSeq, Jul 2008]
