## **Caspase 1 Antibody**

HY-P80587 Cat. No.:

Caspase 1 Antibody is a non-conjugated and Rabbit origined polyclonal antibody about 45 Synonyms:

IHC

**ELISA** 

Shipping with blue ice.

kDa, targeting to Caspase 1. It can be used for WB,IHC-P,ELISA assays with tag free, in the

background of Human, Mouse, Rat.

Host: Rabbit

Reactivity: Human, Mouse, Rat Conjugation: Non-conjugated

SwissProt ID: P29466 Research Field: Cell Biology

Predicted band size: 45 kDa Molecular Weight:

## **PROPERTIES**

Earmulation

Application & Dilution Ratio	WB	1:500-1:1,000
	Application	Dilution Ratio
Appearance	Liquid	
Storage & Stability	Stored at -20°C for 1 year. Avoid repeated freeze / thaw cycles.	
Purity	affinity purified	
Formulation	Supplied in 1*PBS (pH 7.3), 50% glycerol and 0.5% BSA. Preservative: 0.02% sodium azide.	

## DESCRIPTION

Shipping

Background

Caspase 1: This gene encodes a protein which is a member of the cysteine-aspartic acid protease (caspase) family. Sequential activation of caspases plays a central role in the execution-phase of cell apoptosis. Caspases exist as inactive proenzymes which undergo proteolytic processing at conserved aspartic residues to produce 2 subunits, large and small, that dimerize to form the active enzyme. This gene was identified by its ability to proteolytically cleave and activate the inactive precursor of interleukin-1, a cytokine involved in the processes such as inflammation, septic shock, and wound healing. This gene has been shown to induce cell apoptosis and may function in various developmental stages. Studies of a similar gene in mouse suggest a role in the pathogenesis of Huntington disease. Alternative splicing results in transcript variants encoding distinct isoforms. [provided by RefSeq, Mar 2012]
