Product Data Sheet

P Glycoprotein Antibody

Cat. No.:	HY-P80772
Synonyms:	P Glycoprotein Antibody is a non-conjugated and Rabbit origined monoclonal antibody about
	141 kDa, targeting to P Glycoprotein. It can be used for WB assays with tag free, in the
	background of Human.
Host:	Rabbit
Reactivity:	Human
Conjugation:	Non-conjugated
SwissProt ID:	P08183
Research Field:	Signal Transduction
Molecular Weight:	Predicted band size: 141 kDa

PROPERTIES			
Formulation	Supplied in 50 mM Tris-Glycine (pH 7.4), 0.15 M NaCl, 40% Glycerol and 0.05% BSA. Preservative: 0.01% Sodium azide		
Purity	affinity purified		
Storage & Stability	Stored at -20°C for 1 year. Avoid repeated freeze / thaw cycles.		
Appearance	Liquid		
Application &	Application	Dilution Ratio	
Dilution Ratio	WB	1:500-1:1,000	
Shipping	Shipping with blue ice.		

DESCRIPTION	
Background	P Glycoprotein: The membrane-associated protein encoded by this gene is a member of the superfamily of ATP-binding cassette (ABC) transporters. ABC proteins transport various molecules across extra- and intra-cellular membranes. ABC genes are divided into seven distinct subfamilies (ABC1, MDR/TAP, MRP, ALD, OABP, GCN20, White). This protein is a membrof the MDR/TAP subfamily. Members of the MDR/TAP subfamily are involved in multidrug resistance. The protein encoded this gene is an ATP-dependent drug efflux pump for xenobiotic compounds with broad substrate specificity. It is responsible for decreased drug accumulation in multidrug-resistant cells and often mediates the development of resistance to anticancer drugs. This protein also functions as a transporter in the blood-brain barrier. Mutations in this gene are associated with colchicine resistance and Inflammatory bowel disease 13. Alternative splicing and the use of alternative promoters results in multiple transcript variants. [provided by RefSeq, Feb 2017]

Caution: Product has not been fully validated for medical applications. For research use only.
