Proteins

Product Data Sheet

PRMT1 Antibody (YA686)

HY-P80874 Cat. No.:

Synonyms: PRMT1 Antibody (YA686) is a non-conjugated and Mouse origined monoclonal antibody about

42 kDa, targeting to PRMT1 (4E9). It can be used for WB assays with tag free, in the

background of Human.

Host: Mouse Reactivity: Human

Conjugation: Non-conjugated

SwissProt ID: Q99873 Research Field: Cell Biology

Molecular Weight: Predicted band size: 42 kDa

PROPERTIES

Formulation	Supplied in 1*PBS (pH 7.3), 50% glycerol and 0.5% BSA. Preservative: 0.02% sodium azide.	
Purity	affinity purified	
Storage & Stability	Stored at -20°C for 1 year. Avoid repeated freeze / thaw cycles.	
Appearance	Liquid	
Application & Dilution Ratio	Application	Dilution Ratio
	WB	1:500-1:1,000
Shipping	Shipping with blue ice.	

DESCRIPTION

Background

PRMT1 (4E9): This gene encodes a member of the protein arginine N-methyltransferase (PRMT) family. Post-translational modification of target proteins by PRMTs plays an important regulatory role in many biological processes, whereby PRMTs methylate arginine residues by transferring methyl groups from S-adenosyl-L-methionine to terminal guanidino nitrogen atoms. The encoded protein is a type I PRMT and is responsible for the majority of cellular arginine methylation activity. Increased expression of this gene may play a role in many types of cancer. Alternatively spliced transcript variants encoding multiple isoforms have been observed for this gene, and a pseudogene of this gene is located on the long arm of chromosome 5. [provided by RefSeq, Dec 2011]
