

## Product Data Sheet

## TGF alpha Antibody

HY-P80911	
TGF alpha Antibody is a non-conjugated and Rabbit origined monoclonal antibody about 17	
kDa, targeting to TGF alpha. It can be used for WB,IHC-P,IP assays with tag free, in the	
background of Human.	
Rabbit	
Human	
Non-conjugated	
P01135	
Cardiovascular	
Predicted band size: 17 kDa	

PROPERTIES		
Formulation	Supplied in 50 mM Tris-Glycine (pH 7.4), 0.15 M NaCl, 40% Glycerol and 0.05% BSA. Preservative: 0.01% Sodium azide	
Purity	affinity purified	
Storage & Stability	Stored at -20°C for 1 year. Avoid repeated freeze / thaw cycles.	
Appearance	Liquid	
Application &	Application	Dilution Ratio
Dilution Ratio	WB	1:500-1:1,000
	ІНС	1:50-1:100
	IP	1:20
Shipping	Shipping with blue ice.	

## **DESCRIPTION Background** TGF alpha: This gene encodes a growth factor that is a ligand for the epidermal growth factor receptor, which activates a signaling pathway for cell proliferation, differentiation and development. This protein may act as either a transmembrane-bound ligand or a soluble ligand. This gene has been associated with many types of cancers, and it may also be involved in some cases of cleft lip/palate. Alternatively spliced transcript variants encoding different isoforms have been found for this gene. [provided by RefSeq, Sep 2011]

## Caution: Product has not been fully validated for medical applications. For research use only.
