

Blosozumab

Cat. No.:	HY-P99186
CAS No.:	1132758-87-2
Target:	Others
Pathway:	Others
Storage:	Please store the product under the recommended conditions in the Certificate of Analysis.

BIOLOGICAL ACTIVITY

Description	Blosozumab (LY2541546) is an anti-Human sclerostin (SOST) antibody inhibitor. Blosozumab stimulates bone formation and reduces bone resorption. Blosozumab can be used in the research of Osteoporosis ^{[1][2]} .		
IC ₅₀ & Target	sclerostin (SOST) ^[1]		
In Vivo	Blosozumab (1-100 mg/kg, i.v.) shows effects of hyperostosis in rats ^[1] . MCE has not independently confirmed the accuracy of these methods. They are for reference only.		
	Animal Model:	Sprague-Dawley rats ^[2]	
	Dosage:	1, 10, and 100 mg/kg	
	Administration:	Intravenous injection (i.v.), once every 3 days (5-week study) or once weekly (6-month study)	
	Result:	Observed the bone anabolic effects. Showed significant bleeding and morbidity at 100 mg/kg. Decreases in the numbers of platelets. Increased number of bone marrow megakaryocytes at 100 mg/kg.
