

Briobacept

Cat. No.:	HY-P99487
CAS No.:	869881-54-9
Target:	ADC Antibody
Pathway:	Antibody-drug Conjugate/ADC Related
Storage:	Please store the product under the recommended conditions in the Certificate of Analysis.

BIOLOGICAL ACTIVITY

Description	Briobacept (BR 3FC) is a selective human monoclonal antibody targeting to BLyS (BAFF), induces B cells apoptosis. Briobacept is a recombinant glucoprotein, consists of 2 molecules from the BLyS receptor (BR3) and a Fc domain of human IgG1. Briobacept can be used in studies of rheumatoid arthritis (RA) ^{[1][2]} .
IC₅₀ & Target	BLyS (BAFF) ^[1]
In Vitro	Briobacept blocks circulating BLyS, thus inhibiting B cell activation and promoting B cell apoptosis ^[3] . MCE has not independently confirmed the accuracy of these methods. They are for reference only.
In Vivo	Briobacept (100 µg/mouse; i.p.; for 5 d) inhibits basal NF-κB2 activation in wild-type mice ^[4] . Briobacept (100 µg/mouse; i.p.; 3 times per week for 5 weeks) inhibits p52 generation and development of spontaneous lupus-like disease in NZB/WF1 mice ^[4] . MCE has not independently confirmed the accuracy of these methods. They are for reference only.
