

Valziflocept

Cat. No.:	HY-P99529
CAS No.:	1804910-11-9
Target:	Others
Pathway:	Others
Storage:	Please store the product under the recommended conditions in the Certificate of Analysis.

BIOLOGICAL ACTIVITY

Description

Valziflocept (BAX1810; TAK-752) is a recombinant soluble human FcγRIIb receptor that targets Fc and FcγR. FcγRs bind and neutralize pathogenic IgG, thus forming a "decoy" or "scavenger" receptor that can reduce the severity of autoimmune diseases. Valziflocept can be used in studies of autoimmune diseases such as systemic lupus erythematosus (SLE)^[1].
