## Idactamab

| Cat. No.: | HY-P99654 |
| :--- | :--- |
| CAS No.: | $2245205-37-0$ |
| Target: | Others |
| Pathway: | Others |
| Storage: | Please store the product under the recommended conditions in the Certificate of Analysis. |

## BIOLOGICAL ACTIVITY

## Description

$\mathrm{IC}_{50}$ \& Target $\quad$ ASCT2 (SLC1A5) $)^{[1]}$

In Vitro Idactamab inhibits different heme cancer cell lines with $\mathrm{IC}_{50}$ of $0.05-65 \mathrm{ng} / \mathrm{mL}^{[1]}$.
ASCT2 (SLC1A5) is a multi-pass, $\mathrm{Na}^{+}$-dependent neutral amino acid transporter that mediates the uptake of amino acids required for tumor growth and progression ${ }^{[1]}$.
MCE has not independently confirmed the accuracy of these methods. They are for reference only.

In Vivo
Idactamab (INT-001) is an IgG1-k antibody with in vivo activity across a spectrum of hematological malignancies. Idactamab can be used for prepare MEDI7247, a potent and specific ADC, targeting ASCT2 (SLC1A5) ${ }^{[1][2]}$.

Idactamab improves 3 disseminated Acute Myeloid Leukemia (AML) cell line models: The survival rates of TF1a (high expression of ASCT2), MOLM-13 (low expression of ASCT2) and M.V. 411 (high expression of ASCT2) were $0.05 \mathrm{mg} / \mathrm{kg}, 0.1$ $\mathrm{mg} / \mathrm{kg}$, and $0.1 \mathrm{mg} / \mathrm{kg}$, respectively ${ }^{[2]}$.

MCE has not independently confirmed the accuracy of these methods. They are for reference only.
