

Murlentamab

Cat. No.:	HY-P99746
CAS No.:	2058047-65-5
Target:	Others
Pathway:	Others
Storage:	Please store the product under the recommended conditions in the Certificate of Analysis.

BIOLOGICAL ACTIVITY

Description	Murlentamab (3C23K; GM102) is a humanized anti-AMHR II antibody. AMHR II is the anti-Müllerian hormone receptor. Murlentama significantly promotes macrophage-mediated antibody-dependent cell-mediated cytotoxicity (ADCC). Murlentama stimulates pro-inflammatory and anti-tumor internal environment, recruits and activates T cells. Murlentama suppresses tumors growth by inducing naïve macrophage orientation and promoting tumor-associated macrophage (TAM) reprogramming ^[1] .
IC ₅₀ & Target	AMHR II ^[1]
In Vivo	Murlentamab (20 mg/kg; i.v.; twice weekly for 4 weeks) inhibits tumor growth in mouse hepatocarcinoma PDX model in vivo ^[2] . MCE has not independently confirmed the accuracy of these methods. They are for reference only.
