

## Etrolizumab

Cat. No.:	HY-P9984
CAS No.:	1044758-60-2
Target:	Integrin
Pathway:	Cytoskeleton
Storage:	Please store the product under the recommended conditions in the Certificate of Analysis.

### BIOLOGICAL ACTIVITY

<b>Description</b>	Etrolizumab (rhuMAB Beta7) is a gut-selective, anti- $\beta 7$ integrin monoclonal antibody. Etrolizumab is specific targeting of the $\beta 7$ subunit of $\alpha 4\beta 7$ and $\alpha E\beta 7$ integrins with $K_i$ values of 18 nM and 1800 pM for Human $\alpha 4\beta 7$ and Human $\alpha E\beta 7$ -293, respectively. Etrolizumab can be used in research of inflammatory bowel disease (IBD) <sup>[1][2]</sup> .													
<b>IC<sub>50</sub> &amp; Target</b>	$\alpha 4\beta 7$	$\alpha E\beta 7$												
<b>In Vitro</b>	<p>Etrolizumab (rhuMAB Beta7) binds the <math>\beta 7</math> subunit of both <math>\alpha 4\beta 7</math> and <math>\alpha E\beta 7</math> integrins with high affinity, with <math>K_d</math> values of 18 nM, 1800 pM, 181 pM, 116 pM, 57 pM, 31.7 pM, and 25.7 pM for Human <math>\alpha 4\beta 7</math>, Human <math>\alpha E\beta 7</math>-293, Mouse <math>\alpha 4\beta 7</math>-38C13, Human <math>\alpha 4\beta 7</math>-293, Rabbit PBLs, Human PBLs, and Cyno PBLs, respectively<sup>[1]</sup>.</p> <p>Etrolizumab (RPMI 8866 cells and <math>\alpha E\beta 7</math>-293 cells) blocks the interaction of <math>\alpha 4\beta 7</math> with its cognate ligands MAdCAM-1 and VCAM-1 with IC<sub>50</sub> values of 0.075 and 0.089 nM, respectively, and blocks the interaction between <math>\alpha E\beta 7</math> and its ligand E-cadherin with an IC<sub>50</sub> value of 3.96 nM<sup>[1]</sup>.</p> <p>MCE has not independently confirmed the accuracy of these methods. They are for reference only.</p>													
<b>In Vivo</b>	<p>Etrolizumab (rhuMAB Beta7; 5 mg/kg; i.v.; once; normal female BALB/c mice) decreases <math>\beta 7</math> integrins on T lymphocytes<sup>[2]</sup>. Etrolizumab (200 <math>\mu</math>g (100 <math>\mu</math>L); i.p.; once) inhibits lymphocyte homing in the CD45RB<sup>high</sup> T cell-reconstituted SCID mouse model of colitis<sup>[2]</sup>.</p> <p>MCE has not independently confirmed the accuracy of these methods. They are for reference only.</p> <table border="1"> <tr> <td>Animal Model:</td> <td>Normal female BALB/c mice (17-21 g)<sup>[2]</sup></td> </tr> <tr> <td>Dosage:</td> <td>5 mg/kg</td> </tr> <tr> <td>Administration:</td> <td>Intravenous injection; once</td> </tr> <tr> <td>Result:</td> <td>Had 98.3% of intraepithelial CD8<sup>+</sup> T-cell <math>\beta 7</math> integrin receptors and 90.0% of intraepithelial CD4<sup>+</sup> T-cell <math>\beta 7</math> integrin receptors after 24 h.</td> </tr> </table> <table border="1"> <tr> <td>Animal Model:</td> <td>SCID mouse model of colitis<sup>[2]</sup></td> </tr> <tr> <td>Dosage:</td> <td>200 <math>\mu</math>g (100 <math>\mu</math>L)</td> </tr> </table>		Animal Model:	Normal female BALB/c mice (17-21 g) <sup>[2]</sup>	Dosage:	5 mg/kg	Administration:	Intravenous injection; once	Result:	Had 98.3% of intraepithelial CD8 <sup>+</sup> T-cell $\beta 7$ integrin receptors and 90.0% of intraepithelial CD4 <sup>+</sup> T-cell $\beta 7$ integrin receptors after 24 h.	Animal Model:	SCID mouse model of colitis <sup>[2]</sup>	Dosage:	200 $\mu$ g (100 $\mu$ L)
Animal Model:	Normal female BALB/c mice (17-21 g) <sup>[2]</sup>													
Dosage:	5 mg/kg													
Administration:	Intravenous injection; once													
Result:	Had 98.3% of intraepithelial CD8 <sup>+</sup> T-cell $\beta 7$ integrin receptors and 90.0% of intraepithelial CD4 <sup>+</sup> T-cell $\beta 7$ integrin receptors after 24 h.													
Animal Model:	SCID mouse model of colitis <sup>[2]</sup>													
Dosage:	200 $\mu$ g (100 $\mu$ L)													

Administration:	Intraperitoneal injection; once
Result:	Blocked lymphocyte recruitment and homing to the inflamed colon.
