

Benzhydrol

Cat. No.:	HY-W004059		
CAS No.:	91-01-0		
Molecular Formula:	C ₁₃ H ₁₂ O		
Molecular Weight:	184.23		
Target:	Biochemical Assay Reagents		
Pathway:	Others		
Storage:	Powder	-20°C	3 years
		4°C	2 years
	In solvent	-80°C	6 months
		-20°C	1 month

BIOLOGICAL ACTIVITY

Description	Diphenylmethanol is a biochemical reagent that can be used as a biological material or organic compound for life science related research.
In Vitro	Benzhydrol is widely used as intermediates in pharmaceuticals (including antihistamines), agrochemicals, perfumes and other organic compounds. It is used as a fixative in the perfume industry. It is involved in polymerization reaction as a terminating group. It is used as precursor to prepare modafinil, benztropine and diphehydramine. MCE has not independently confirmed the accuracy of these methods. They are for reference only.

Caution: Product has not been fully validated for medical applications. For research use only.
