

## Methyl 3-boronobenzoate

Cat. No.:	HY-W004091
CAS No.:	99769-19-4
Molecular Formula:	C <sub>8</sub> H <sub>9</sub> BO <sub>4</sub>
Molecular Weight:	179.97
Target:	Biochemical Assay Reagents
Pathway:	Others
Storage:	<div>Powder</div> <div>-20°C 3 years</div> <div>4°C 2 years</div> <div>In solvent</div> <div>-80°C 6 months</div> <div>-20°C 1 month</div>

### BIOLOGICAL ACTIVITY

Description	3-(Methoxycarbonyl)phenylboronic acid is a biochemical reagent that can be used as a biological material or organic compound for life science related research.
In Vitro	<p>Reagent used for tandem-type Pd(II)-catalyzed oxidative Heck reaction and intramolecular CH amidation sequence, copper-mediated ligandless aerobic fluoroalkylation of arylboronic acids with fluoroalkyl iodides, one-pot ipso-nitration of arylboronic acids, copper-catalyzed nitration, cyclocondensation followed by palladium-phosphine-catalyzed Suzuki-Miyaura coupling. Reagent used in Preparation of biaryls via nickel-catalyzed Suzuki-Miyaura cross-coupling reaction of aryl halides with arylboronic acid, chromenones and their bradykinin B1 antagonistic activity, Pt nanoparticles at Photoactive metal-Organic frameworks resulting in efficient hydrogen evolution via synergistic photoexcitation and electron injection, salicylate-based thienylbenzoic acids as E. coli methionine aminopeptidase inhibitor.</p> <p>MCE has not independently confirmed the accuracy of these methods. They are for reference only.</p>

**Caution: Product has not been fully validated for medical applications. For research use only.**
