

N-Methylbenzylamine-d₃

Cat. No.:	HY-W007426S
CAS No.:	122025-09-6
Molecular Formula:	C ₈ H ₈ D ₃ N
Molecular Weight:	124.2
Target:	Isotope-Labeled Compounds
Pathway:	Others
Storage:	-20°C, protect from light, stored under nitrogen * In solvent : -80°C, 6 months; -20°C, 1 month (protect from light, stored under nitrogen)

BIOLOGICAL ACTIVITY

Description	N-Methylbenzylamine-d ₃ is the deuterium labeled N-Methylbenzylamine[1]. N-methylbenzylamine is a member of phenylmethanamines. N-methylbenzylamine can be found in carrot, which makes N-methylbenzylamine a potential biomarker for the consumption of these food products[2].
In Vitro	Stable heavy isotopes of hydrogen, carbon, and other elements have been incorporated into drug molecules, largely as tracers for quantitation during the drug development process. Deuteration has gained attention because of its potential to affect the pharmacokinetic and metabolic profiles of drugs ^[1] . MCE has not independently confirmed the accuracy of these methods. They are for reference only.
