

Tetrabutylammonium acetate

Cat. No.:	HY-W008039		
CAS No.:	10534-59-5		
Molecular Formula:	C ₁₈ H ₃₉ NO ₂		
Molecular Weight:	301.51		
Target:	Biochemical Assay Reagents		
Pathway:	Others		
Storage:	Powder	-20°C	3 years
		4°C	2 years
	In solvent	-80°C	6 months
		-20°C	1 month

BIOLOGICAL ACTIVITY

Description	Tetrabutylammonium acetate is an organic compound commonly used as a catalyst and solvent. It can be used to catalyze or promote reactions in certain organic reactions, and is widely used in batteries, solar cells and pigments. In addition, this compound is widely used in the oil and gas industry, for example as a carbonate dissolver.
In Vitro	Tetrabutylammonium acetate is a biochemical reagent that can be used as a biological material or organic compound for life science related research. MCE has not independently confirmed the accuracy of these methods. They are for reference only.

Caution: Product has not been fully validated for medical applications. For research use only.
