

## Diethyl decanedioate

Cat. No.:	HY-W009443		
CAS No.:	110-40-7		
Molecular Formula:	C <sub>14</sub> H <sub>26</sub> O <sub>4</sub>		
Molecular Weight:	258.36		
Target:	Biochemical Assay Reagents		
Pathway:	Others		
Storage:	Pure form	-20°C	3 years
		4°C	2 years
	In solvent	-80°C	6 months
		-20°C	1 month

### BIOLOGICAL ACTIVITY

<b>Description</b>	Diethyl decanedioate is an organic compound commonly used as a raw material for flavors and food additives. It can be used to make fruit and mint flavors, and is widely used in some food processing and cosmetic production. In addition, this compound is also used as a reagent and intermediate in some organic synthesis reactions.
<b>In Vitro</b>	Diethyl decanedioate is a biochemical reagent that can be used as a biological material or organic compound for life science related research. MCE has not independently confirmed the accuracy of these methods. They are for reference only.

**Caution: Product has not been fully validated for medical applications. For research use only.**
