## **BIOLOGICAL ACTIVITY**

**Description** Butyraldehyde 2,4-dinitrophenylhydrazone-d<sub>3</sub> is the deuterium labeled Butyraldehyde 2,4-dinitrophenylhydrazone[1].

In Vitro Stable heavy isotopes of hydrogen, carbon, and other elements have been incorporated into drug molecules, largely as

tracers for quantitation during the drug development process. Deuteration has gained attention because of its potential to

affect the pharmacokinetic and metabolic profiles of  $drugs^{[1]}$ .

MCE has not independently confirmed the accuracy of these methods. They are for reference only.
