

Cholesteryl palmitate-d₉

Cat. No.: HY-W010708S
Molecular Formula: C₄₃H₆₇D₉O₂
Molecular Weight: 634.12
Target: Endogenous Metabolite
Pathway: Metabolic Enzyme/Protease
Storage: Solution, -20°C, 2 years

BIOLOGICAL ACTIVITY

Description	Cholesteryl palmitate-d ₉ is the deuterium labeled Cholesteryl palmitate. Cholesteryl palmitate is a useful prognostic biomarker for chronic interstitial pneumonia (CIP).
In Vitro	Stable heavy isotopes of hydrogen, carbon, and other elements have been incorporated into drug molecules, largely as tracers for quantitation during the drug development process. Deuteration has gained attention because of its potential to affect the pharmacokinetic and metabolic profiles of drugs ^[1] . MCE has not independently confirmed the accuracy of these methods. They are for reference only.
