

## Triphenylmethane

|                    |                                 |       |          |
|--------------------|---------------------------------|-------|----------|
| Cat. No.:          | HY-W012019                      |       |          |
| CAS No.:           | 519-73-3                        |       |          |
| Molecular Formula: | C <sub>19</sub> H <sub>16</sub> |       |          |
| Molecular Weight:  | 244.34                          |       |          |
| Target:            | Biochemical Assay Reagents      |       |          |
| Pathway:           | Others                          |       |          |
| Storage:           | Powder                          | -20°C | 3 years  |
|                    |                                 | 4°C   | 2 years  |
|                    | In solvent                      | -80°C | 6 months |
|                    |                                 | -20°C | 1 month  |

### BIOLOGICAL ACTIVITY

|                    |   |
|--------------------|---|
| <b>Description</b> | Triphenylmethane is a biochemical reagent that can be used as a biological material or organic compound for life science related research.                                      |
| <b>In Vitro</b>    | Triphenylmethane is a Synthetic that is a small-molecule photoantimicrobial.<br>MCE has not independently confirmed the accuracy of these methods. They are for reference only. |

**Caution: Product has not been fully validated for medical applications. For research use only.**
