

## DMT-dT Phosphoramidite-d<sub>11</sub>

<b>Cat. No.:</b>	HY-W013068S3
<b>Molecular Formula:</b>	C <sub>40</sub> H <sub>38</sub> D <sub>11</sub> N <sub>4</sub> O <sub>8</sub> P
<b>Molecular Weight:</b>	755.88
<b>Target:</b>	Isotope-Labeled Compounds; DNA/RNA Synthesis
<b>Pathway:</b>	Others; Cell Cycle/DNA Damage
<b>Storage:</b>	Please store the product under the recommended conditions in the Certificate of Analysis.

### BIOLOGICAL ACTIVITY

<b>Description</b>	DMT-dT Phosphoramidite-d <sub>11</sub> is deuterium labeled DMT-dT Phosphoramidite (HY-W013068). DMT-dT Phosphoramidite is typically used in the synthesis of DNA.
<b>In Vitro</b>	Stable heavy isotopes of hydrogen, carbon, and other elements have been incorporated into drug molecules, largely as tracers for quantitation during the drug development process. Deuteration has gained attention because of its potential to affect the pharmacokinetic and metabolic profiles of drugs <sup>[1]</sup> . MCE has not independently confirmed the accuracy of these methods. They are for reference only.
