

## Djalonensone-d<sub>3</sub>

Cat. No.:	HY-W013863S
CAS No.:	2468774-90-3
Molecular Formula:	C <sub>15</sub> H <sub>9</sub> D <sub>3</sub> O <sub>5</sub>
Molecular Weight:	275.27
Target:	Isotope-Labeled Compounds
Pathway:	Others
Storage:	Please store the product under the recommended conditions in the Certificate of Analysis.

### BIOLOGICAL ACTIVITY

<b>Description</b>	Djalonensone-d <sub>3</sub> is a deuterium labeled Djalonensone (HY-W013863). Djalonensone, isolated from the roots of <i>Anthocleista djalonensis</i> (Loganiaceae), is an important taxonomic marker of the plant species <sup>[1][2]</sup> .
<b>In Vitro</b>	Stable heavy isotopes of hydrogen, carbon, and other elements have been incorporated into drug molecules, largely as tracers for quantitation during the drug development process. Deuteration has gained attention because of its potential to affect the pharmacokinetic and metabolic profiles of drugs <sup>[1]</sup> . MCE has not independently confirmed the accuracy of these methods. They are for reference only.
