

3-Amino-9-ethylcarbazole

Cat. No.:	HY-W014386
CAS No.:	132-32-1
Molecular Formula:	C ₁₄ H ₁₄ N ₂
Molecular Weight:	210.28
Target:	Biochemical Assay Reagents
Pathway:	Others
Storage:	4°C, protect from light * In solvent : -80°C, 6 months; -20°C, 1 month (protect from light)

BIOLOGICAL ACTIVITY

Description	9-Ethyl-9H-carbazol-3-amine With high electron mobility and other favorable electronic properties, the compound is known for its use in organic electronic devices such as organic light-emitting diodes (OLED) and organic solar cells) have been investigated for potential applications. 9-Ethyl-9H-carbazol-3-amine It can also be used as a starting material for the synthesis of other organic compounds.
In Vitro	3-Amino-9-ethylcarbazole is a biochemical reagent that can be used as a biological material or organic compound for life science related research. MCE has not independently confirmed the accuracy of these methods. They are for reference only.

Caution: Product has not been fully validated for medical applications. For research use only.
