

Product Data Sheet

N-Isovalerylglycine-d₉

Cat. No.: HY-W015464S CAS No.: 1330037-21-2 Molecular Formula: $C_7H_4D_9NO_3$ Molecular Weight: 168.24

Target: **Endogenous Metabolite** Pathway: Metabolic Enzyme/Protease

Storage:

4°C 2 years In solvent -80°C 6 months -20°C 1 month

Powder -20°C 3 years

BIOLOGICAL ACTIVITY

Description	N-Isovalerylglycine- d_9 is the deuterium labeled N-Isovaleroylglycine. N-Isovaleroylglycine is an acyl glycine and could be used as a biomarker for the predispositon for weight gain and obesity.
In Vitro	Stable heavy isotopes of hydrogen, carbon, and other elements have been incorporated into drug molecules, largely as tracers for quantitation during the drug development process. Deuteration has gained attention because of its potential to affect the pharmacokinetic and metabolic profiles of drugs ^[1] . MCE has not independently confirmed the accuracy of these methods. They are for reference only.
