

## 2-(Benzylamino)ethanol

Cat. No.:	HY-W017395
CAS No.:	104-63-2
Molecular Formula:	C <sub>9</sub> H <sub>13</sub> NO
Molecular Weight:	151.21
Target:	Biochemical Assay Reagents
Pathway:	Others
Storage:	4°C, protect from light * In solvent : -80°C, 6 months; -20°C, 1 month (protect from light)

### BIOLOGICAL ACTIVITY

<b>Description</b>	2-(Benzylamino)ethanol is a biochemical reagent that can be used as a biological material or organic compound for life science related research.
<b>In Vitro</b>	Has Pharmaceutical applications. N-Benzylethanolamine is used in the synthesis of imidazoles as potent calcitonin (CGRP) antagonists. Also it aids in the preparation of benzofused hydroxamic acids, as useful fragments for the synthesis of histone deacetylase inhibitors. MCE has not independently confirmed the accuracy of these methods. They are for reference only.

**Caution: Product has not been fully validated for medical applications. For research use only.**
