

## L-Asparagine-<sup>15</sup>N<sub>2</sub>,d<sub>3</sub> monohydrate

Cat. No.:	HY-W017443S3
Molecular Formula:	C <sub>4</sub> H <sub>7</sub> D <sub>3</sub> <sup>15</sup> N <sub>2</sub> O <sub>4</sub>
Molecular Weight:	155.14
Target:	Endogenous Metabolite; Isotope-Labeled Compounds
Pathway:	Metabolic Enzyme/Protease; Others
Storage:	Please store the product under the recommended conditions in the Certificate of Analysis.

### BIOLOGICAL ACTIVITY

<b>Description</b>	L-Asparagine- <sup>15</sup> N <sub>2</sub> ,d <sub>3</sub> (monohydrate) is the deuterium and <sup>15</sup> N-labeled L-Asparagine monohydrate. L-Asparagine monohydrate ((-)-Asparagine monohydrate) is a non-essential amino acid that is involved in the metabolic control of cell functions in nerve and brain tissue.
<b>In Vitro</b>	Stable heavy isotopes of hydrogen, carbon, and other elements have been incorporated into drug molecules, largely as tracers for quantitation during the drug development process. Deuteration has gained attention because of its potential to affect the pharmacokinetic and metabolic profiles of drugs <sup>[1]</sup> . MCE has not independently confirmed the accuracy of these methods. They are for reference only.
