Product Data Sheet

2-Methylanisole-d3

Cat. No.: HY-W027751S

CAS No.: 258832-47-2

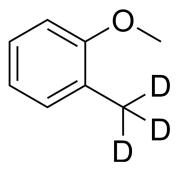

Molecular Formula: $C_8H_7D_3O$

Molecular Weight:

125.18 Target: Isotope-Labeled Compounds

Pathway: Others

Storage: Please store the product under the recommended conditions in the Certificate of

BIOLOGICAL ACTIVITY

Description	$2- Methylan is ole-d_3 is the deuterium labeled 2- Methylan is ole [1]. 2- Methylan is ole is a monomethoxyben zene and acts as an intermediate for the preparation of compounds with methylhydroquinone core [2].$
In Vitro	Stable heavy isotopes of hydrogen, carbon, and other elements have been incorporated into drug molecules, largely as tracers for quantitation during the drug development process. Deuteration has gained attention because of its potential to affect the pharmacokinetic and metabolic profiles of drugs ^[1] . MCE has not independently confirmed the accuracy of these methods. They are for reference only.
