Silver diethyldithiocarbamate

Cat. No.:	HY-W034674	
CAS No.:	1470-61-7	S
Molecular Formula:	C ₅ H ₁₀ AgNS ₂	Ĭ
Molecular Weight:	256.14	
Target:	Biochemical Assay Reagents	Ag5
Pathway:	Others	
Storage:	4°C, protect from light, stored under nitrogen	
	* In solvent : -80°C, 6 months; -20°C, 1 month (protect from light, stored under	
	nitrogen)	

Product Data Sheet

Ν

BIOLOGICAL ACTIVITY			
DIOLOGICAL ACTIVITY			
Description	Silver diethyldithiocarbamate (SDDC) is an organic compound consisting of silver ions complexed with the ligand diethyldithiocarbamate. SDDC is mainly used as a reagent in analytical chemistry to detect the presence of copper, iron and other heavy metals in various materials. It acts as a chelating agent, binding to metal ions and forming stable complexes that can be easily analyzed using techniques such as UV-Vis spectroscopy.		
In Vitro	Silver diethyldithiocarbamate is a biochemical reagent that can be used as a biological material or organic compound for life science related research. MCE has not independently confirmed the accuracy of these methods. They are for reference only.		

Caution: Product has not been fully validated for medical applications. For research use only.
