

Methyl sorbate

Cat. No.:	HY-W068700		
CAS No.:	1515-80-6		
Molecular Formula:	C ₇ H ₁₀ O ₂		
Molecular Weight:	126.15		
Target:	Biochemical Assay Reagents		
Pathway:	Others		
Storage:	Pure form	-20°C	3 years
		4°C	2 years
	In solvent	-80°C	6 months
		-20°C	1 month

BIOLOGICAL ACTIVITY

Description	Methyl sorbate, which is an ester formed by the condensation of methanol and hexa-2,4-dienoic acid, is commonly used as a flavoring agent and fragrance in the food and cosmetic industries due to its fruity, floral, and taste, and in addition, it has also been investigated for its potential use as a starting material in the synthesis of various organic compounds, including pharmaceuticals, agrochemicals, and polymers.
In Vitro	Methyl hexa-2,4-dienoate is a biochemical reagent that can be used as a biological material or organic compound for life science related research. MCE has not independently confirmed the accuracy of these methods. They are for reference only.

Caution: Product has not been fully validated for medical applications. For research use only.
