

## Agarose,Low melting point

Cat. No.:	HY-W088070A		
CAS No.:	9012-36-6		
Target:	Biochemical Assay Reagents		
Pathway:	Others		
Storage:	Powder	-20°C	3 years
		4°C	2 years
	In solvent	-80°C	6 months
		-20°C	1 month

# Agarose

### BIOLOGICAL ACTIVITY

#### Description

Agarose,Low melting point is a kind of agarose, a kind of polysaccharide that can be derived from seaweed. It is commonly used in molecular biology and biochemistry to isolate and purify DNA and RNA fragments. Agarose,Low melting point is a low melting point agarose, which is suitable for the recovery of large DNA fragments and enzymatic reactions in gels and other applications. In addition, it has been used in various techniques, such as pulsed field gel electrophoresis and capillary electrophoresis for analyzing genetic material.

#### In Vitro

Agarose,Low melting point is a biochemical reagent that can be used as a biological material or organic compound for life science related research.

MCE has not independently confirmed the accuracy of these methods. They are for reference only.

**Caution: Product has not been fully validated for medical applications. For research use only.**
