

Ethyl docos-13-enoate

Cat. No.:	HY-W099644		
CAS No.:	37910-77-3		
Molecular Formula:	C ₂₄ H ₄₆ O ₂		
Molecular Weight:	366.62		
Target:	Biochemical Assay Reagents		
Pathway:	Others		
Storage:	Pure form	-20°C	3 years
		4°C	2 years
	In solvent	-80°C	6 months
		-20°C	1 month

BIOLOGICAL ACTIVITY

Description	Ethyl docos-13-enoate is a colorless or pale yellow liquid with a sweet floral aroma, used as a flavoring agent in the food industry and as a flavor enhancer in perfumes and colognes. It is also found in some vegetable oils and is used as a surfactant and emulsifier in personal care products. Ethyl docos-13-enoate is a versatile compound used in various industries due to its pleasant odor and ability to mix ingredients together.
In Vitro	Ethyl docos-13-enoate is a biochemical reagent that can be used as a biological material or organic compound for life science related research. MCE has not independently confirmed the accuracy of these methods. They are for reference only.

Caution: Product has not been fully validated for medical applications. For research use only.
