

## Butyl Palmitate

Cat. No.:	HY-W127338		
CAS No.:	111-06-8		
Molecular Formula:	$C_{20}H_{40}O_2$		
Molecular Weight:	312.53		
Target:	Biochemical Assay Reagents		
Pathway:	Others		
Storage:	Pure form	-20°C	3 years
		4°C	2 years
	In solvent	-80°C	6 months
		-20°C	1 month

### BIOLOGICAL ACTIVITY

Description	Butyl Palmitate is an ester compound commonly used as a conditioning, emollient or fragrance in a variety of cosmetic and personal care products. In addition, it can be used as a solvent or lubricant in various industrial applications. Its unique chemical properties make it an important ingredient in a variety of commercial products, including perfumes, lotions and hair care products.
In Vitro	Butyl Palmitate is a biochemical reagent that can be used as a biological material or organic compound for life science related research. MCE has not independently confirmed the accuracy of these methods. They are for reference only.

**Caution: Product has not been fully validated for medical applications. For research use only.**
