

Oleoyl Chloride

Cat. No.:	HY-W127344
CAS No.:	112-77-6
Molecular Formula:	C ₁₈ H ₃₃ ClO
Molecular Weight:	300.91
Target:	Biochemical Assay Reagents
Pathway:	Others
Storage:	4°C, sealed storage, away from moisture * In solvent : -80°C, 6 months; -20°C, 1 month (sealed storage, away from moisture)

BIOLOGICAL ACTIVITY

Description	Oleoyl chloride A pungent-smelling liquid commonly used as a reagent in organic synthesis, especially for the production of a variety of organic compounds, including pharmaceuticals and agrochemicals. In addition, it can also be used as a cross-linking agent or surfactant in polymer chemistry. Its unique chemical properties make it an important ingredient in a variety of industrial processes, including petrochemical refining and materials science.
In Vitro	Oleoyl Chloride is a biochemical reagent that can be used as a biological material or organic compound for life science related research. MCE has not independently confirmed the accuracy of these methods. They are for reference only.

Caution: Product has not been fully validated for medical applications. For research use only.
